

IMS Patient App

Communicate with your patients, their way.

Go Mobile with IMS Patient App

Available on
Android and
iOS

IMS Patient App

Deliver Better Patient Care, Empower Your Patients, Streamline Workflow

IMS Patient App is a mobile platform designed to allow your patients to actively manage their health care.

Billing - Get Paid Faster

Patients can view billing statements and pay balances within the app at their convenience, whether they are in or out of your office.

Prescriptions - Expedite Requests

Patients can access their current list of active prescriptions and send refill requests.

Appointments - Save Time

Reduce time spent on the phone for routine tasks. Patients can request to schedule their own appointments through the app.

Documentation - Quick Access

Send important documents to your patients quickly & securely. Patients can view important health information on the go.

Barcode* - Automate Check-in

Patients can easily check themselves in upon entering your practice with a quick scan using the app on their mobile device.

**This feature is only available for AllergyEHR clients.*

Messages - Communicate Efficiently

Patients can compose & send messages to their provider/clinical staff, as well as view messages sent from IMS by their care team.

Did You Know?

In the past year, **62%** of smartphone owners have used their phone to look up information about a health condition.
